

Official statement

All food and cosmetics produced by India Cosmetics are based on Cannabis sativa L. Cannabis sativa L. never contains more than 0.02% THC and it is a scientific fact. However, we test our hemp oil for THC content on a regular basis, prophylactically. Attached to the statement, I am sending a study of our hemp oil, in which the THC content is underlined (ND means „not found“). The THC content in the oil is the same as the THC content in all other organs of the plant - including flowers, seeds or leaves from which hemp tea is produced ("Lekka herbatka relaksująca" from India Cosmetics).
